Coach Jonny Carter | Houston Dynamo Juniors
Talent Development Program TDP | Program Director

To deliver 'next-level' soccer programming for Dynamo Juniors elite players; Boys & Girls

- Ensuring that elite level players are retained at Dynamo Juniors clubs
- Increasing the potential recruitment of elite players into Dynamo Juniors clubs
- Building the relationships between Dynamo Juniors clubs & **Houston Dynamo** | **Houston Dash**
- Creating a competitive edge for Dynamo Juniors clubs versus local rival soccer programs

Pooling the best resources within the Dynamo Juniors network to provide players with a more intense echelon of soccer.

To build a coaching program and elite team formation inclusive of the most talented players from each Dynamo Juniors affiliate club to compete at a level of play higher than the current top team/s within each Dynamo Juniors affiliate club.

The Dynamo Juniors **Talent Development Program (TDP)** will bridge the distance between the elite teams at affiliate club level and the Academy programs hosted in Houston by the **Dynamo & Dash**. With the support of the Academy Technical Directors, elite players within the Dynamo Juniors pyramid will have greater exposure to higher level training & playing opportunities and greater prospect of identification.

SOCCER DEVELOPMENT PROJECT

Soccer Development Project 1-v-1 Soccer Skills Builder Volume I & II

Published Coaching Manuals

“Developing highly skillful and intelligent players is a key developmental objective of the Houston Dynamo Academy. The exercises in this manual focus on the theme of the 1-v-1 and developing players that are confident on the dribble, who can use both feet, and who able to change direction effectively. Coach Jonny Carter has put together a strong variety of exercises that will be both enjoyable for the players and helpful for any coach, especially during the early ages and Foundation Phase of U10, U11, U12. Ultimately, when a young player develops the confidence to control, protect, and dominate the ball and the 1-v-1 situation, they will be more equipped and effective when progressing into the other team tactical elements of the game.”

- Houston Dynamo Academy Director
Paul Holocher

“The 1-v-1 attacking situation is the most exciting and yet fundamental feature of soccer; the cerebral artist that can outwit an opponent with mazy dribbling, lightning speed of movement and a baffling range of skills is a crowd pleaser and first on the coaches’ team selection. At the Dash Academy level, we have a heavy focus on the 1-v-1 discipline and its connection to the wider context of the game, both from an attacking perspective and from a defensive position.

Technical aptitude is one element of the 1-v-1 situation, but the tactical understanding of knowing when and where to be creative is essential learning. Taking repeated different looks at a range of varying game-specific scenarios is necessary for the youth player to thrive through the Academy generations and into the professional ranks.
